

9 December 2025

**“Smart Tender - E-tendering Platform” and “Open E-tendering Platform”
Registered Fire Service Installation Contractors**

Starting 1 January 2026, the Urban Renewal Authority will implement the following new arrangements for companies holding accounts on the "E-Tendering Platform" and "Open E-Tendering Platform" (hereafter referred to as "the Platform") that are listed on the "Registered Fire Service Installation Contractors":

1. The "Registered Fire Service Installation Contractors" on the Platform (hereafter referred to as "the Old List") will be replaced by the "List of Registered Fire Service Contractors that have Successfully Completed Fire Safety Improvement Works" managed by the Fire Services Department (hereafter referred to as "the New List"). (For more information, please click: [Link](#))
2. If your company is included in the New List and holds a Platform account, you will continue to receive tender invitations from the Platform and can download tender documents for bidding as usual.
3. Companies that are not included in the New List will have their Old List accounts on the Platform cease to operate from the effective date mentioned above. Companies that are included in the New List but do not have a Platform account will receive an email invitation from the Authority to open a Platform account.

If you have any inquiries regarding the above matters, please contact our staff at: 3188 1188.
